# DESINFECT SOLAR FIX - SUNBED HYGIENE

**The Nationwide Solaria Ordinance regulates the proper cleaning of lying areas and goggles. Many customers of a tanning studio wonder if the tanning beds have been sufficiently disinfected beforehand. To take the uncertainty and create transparency, a complete cleaning after each guest must be made.**

The current Federal Solaria Ordinance of 26.07.2016 contains all the federal regulations for solarium operators. Under §2 point 3.2 the guidelines are listed, which give information about the hygiene in the solarium.

- The lying area of a whole-body irradiation unit (UV irradiation couch) must either be recoiled with a protective foil after each use or be cleaned with a suitable disinfectant (oxygen or chlorine cleavage) in the concentration and exposure time recommended by the manufacturer of the disinfectant.

**DESINFECT SOLAR FIX** is an effective protection against bacteria, fungi and germs for cleaning and rapid disinfection. Versatile, high material compatibility and quick-drying. Is supplied as a concentrate. **DESINFECT SOLAR FIX** is pH-neutral, colorless & fragrance free and 100% naturally degradable. Minimum exposure time only 60 seconds! Quality Made in Germany.

## CHARACTERISTICS

- broad spectrum of activity against micro-organisms
- bactericidal, yeasticidal, fungicidal, virucidal, sporicidal

## COMPOSITION

Ingredients: water, table salt, sodium hypochlorite  
Active ingredients: < 0.15% sodium hypochlorite (NaOCl)

## DOSAGE & APPLICATION

To prepare a ready-to-use solution, dosed **DESINFECT SOLAR FIX 1: 9**.

Fully wet the pre-cleaned and disinfected, washable surfaces with sufficient product. Observe contact time. Any remaining product residues are harmless from a toxicological point of view.

## TESTS & SERVICES

- EN 1040 - EN 1276 - EN 1650
- EN 13697 - EN 13727
- VAH / DGHM
- IHO Disinfectant list
- NSF International

## EFFECTIVENESS

**DESINFECT SOLAR FIX** hygiene is tested according to European standards and ensures full effectiveness against Legionella, bacteria, viruses and fungi.

## TECHNICAL INFORMATION & STORAGE

Color / shape: colorless, liquid

pH value: 6.7 - 7.5

Keep container tightly closed. Store cool, frost-free and protected from light.

**LABELING** - Not applicable according to GefStVo  
**DESINFECT SOLAR FIX** is not a hazardous material. However, precautions should be observed when handling chemicals. Batch number and expiry date see imprint.

## MATERIAL COMPATIBILITY

If used properly, no material damage is to be expected.

## MORE INFORMATION

All information in this product data sheet corresponds to our current level of knowledge. Different conditions in the practical application can not be checked by us in detail. The user is obliged to check the compatibility of the product or to seek technical advice.
